## How it Works Product Guide Running the policy

### Guide to making changes to a policy

#### Important information

**If a change is required to the policy, we should be:**

- contacted in advance, in writing, of the change required
- provided with clear details of the change in writing

**We will not backdate any amendments to the policy.**

Provided we have received a written request prior to the date the change is required we will normally make the changes from that date, provided the change is acceptable to us.

**We may also look to re-apply some or all of the policy exclusions at the date any changes are made.**

Please note that there are circumstances where we may amend the terms of the policy. See document **How is the cost calculated** for further information.

#### Terminology used

##### Evidence of Insurability

Any documentary or medical evidence that we may reasonably require to include someone for benefits in the policy.

##### Actively at Work

Means an employee:

- is present at their place of work
- has not received any medical advice to refrain from work
- is mentally and physically capable of fully performing the normal regular duties associated with the job they are engaged to do
- is working their normal contracted number of hours, either at their normal place of business or at a place that the business requires

##### Membership data

This means full details of individuals to be insured i.e. gender, date of birth, salary, occupation, category of cover, postcode of normal place of work.

See **What is needed to provide a quote?** for further information.

## How it Works Product Guide Running the policy

### Types of changes

#### Our classification

We currently classify the type of changes as follows:

- administration
- policy
- policy re-writes and hive off policies
- risk amendment

#### Administration changes

Our liabilities do not change however, the cost involved in providing cover may alter. Examples are changing the:

- annual revision date
- method of paying premiums
- premium payment frequency
- level of commission paid

**Appendix 1** gives more detail about this type of change.

#### Policy changes

Our liabilities and the cost involved in providing cover are not expected to change. Examples are:

- the policyholder/principal employer changes name or registered address
- any of the companies insured change name or registered address

**Appendix 2** gives more detail about this type of change.

#### Policy re-writes and hive off policies

The insurance is currently provided through an existing Canada Life policy but a new, replacement or additional policy is required. Reasons why we may need to set up another policy are as follows:

- an additional policy is required in order for us to provide separate accounts
- a different organisation replaces an existing policyholder/principal employer
- a change in a **Change of Policyholder form** cannot be completed. This is commonly known as a re-write
- the existing policy is to be split into multiple policies. This could happen for a number of different reasons

**Appendix 3** gives more detail about this type of change.

#### Risk amendment

Our liabilities may change immediately or at some point in the future. These changes can have cost implications but these will be advised as part of our confirmation process.

- changes to the level of benefit insured, or amending the definition of earnings used in the calculation of the benefit
- add or remove our additional range of critical illnesses or Total Permanent Disability
- add or remove Spouse and Civil Partner cover
- add or remove groups of employees (including TUPE transfers, companies or organisations) to the policy
- the postcode of any company's or individual's normal place of work changes
- changing the minimum, maximum entry age or minimum service requirement for cover to commence
- changing the age on which cover ceases

**Appendix 4** gives more detail about this type of change.

# GROUP CRITICAL ILLNESS

## How it Works Product Guide Running the policy

### What we do when asked to make changes to a policy

#### Assessment process

We will consider:

- whether we understand the change requested
- are we legally able to make the change
- do we want to allow the change
- what are the immediate risks
- what is the impact on the cost

#### Understanding the change requested

We need to fully understand the change being requested before we can move on to the next stage of our process.

We will seek further information if required to gain this understanding. Once fully understood, we will look to categorise the change.

#### Are we legally able to make the change?

Current legislation will always be considered to ensure our policy remains compliant.

#### Do we want to allow the change?

We will assess the requested change to decide whether it fits within our current risk strategies and limits. If the request falls outside of these, we will assess whether this can be extended in order to accommodate the change.

#### What are the immediate risks?

Our concern is whether we are being asked to change the policy because it is known by the policyholder that a claim is likely to occur in the near future.

We review the additional exposure in order to determine how any immediate risks can be reduced or eliminated. For many changes, this is achieved through requesting evidence of insurability (see page 1) appropriate to that change.

The determining factors involved in the evidence of insurability (see page 1) requested are the number of individuals affected by the requested change and the additional risk to us:

Evidence of insurability (see page 1) which can be requested can be but no limited to:

- medical underwriting
- satisfying our actively at work conditions (see page 1)

#### What is the impact on the cost of the cover?

The change requested may have an effect on the probability of a claim occurring or the expected level of claim payment.

It may be necessary to review the premium rates being charged on the policy to understand whether the current premiums are sufficient to provide the amended cover.

# GROUP CRITICAL ILLNESS

## How it Works Product Guide Running the policy

### What we do when we are asked to make changes to a policy (continued)

#### Confirming risk

Once we have completed our assessment we will confirm whether we are willing to amend the policy as requested. If we make the change, we will confirm in writing:

- the date we will amend the policy
- any requirements we have and any other actions we need to carry out
- possible impacts on policy terms and conditions
- what documentation and/or literature will be updated/issued

#### Date we will amend the policy

Provided the change is acceptable to us and we receive the written request prior to the date the amendments is required, we will normally make the alteration from that date.

#### Requirements to make the change and any other actions we need to carry out

This may include:

- evidence of insurability required, including any forms which need to be completed
- information about those insured. This could amount to full data so that rates can be reviewed, or the benefits insured for accounting purposes. See **What is needed to provide a quote?** for further information
- additional deposit premiums required in order to implement the change

#### Impact on policy terms and conditions

We will confirm the terms and conditions which may be introduced, altered or re-applied as a result of the change; e.g. reapplication of the **Pre-Existing and Related Conditions Exclusions**.

If these updated terms cannot be provided immediately we will confirm what documentation/literature will need to be updated, e.g. Policy Particulars and Policy Conditions.
